

Top Right Wing

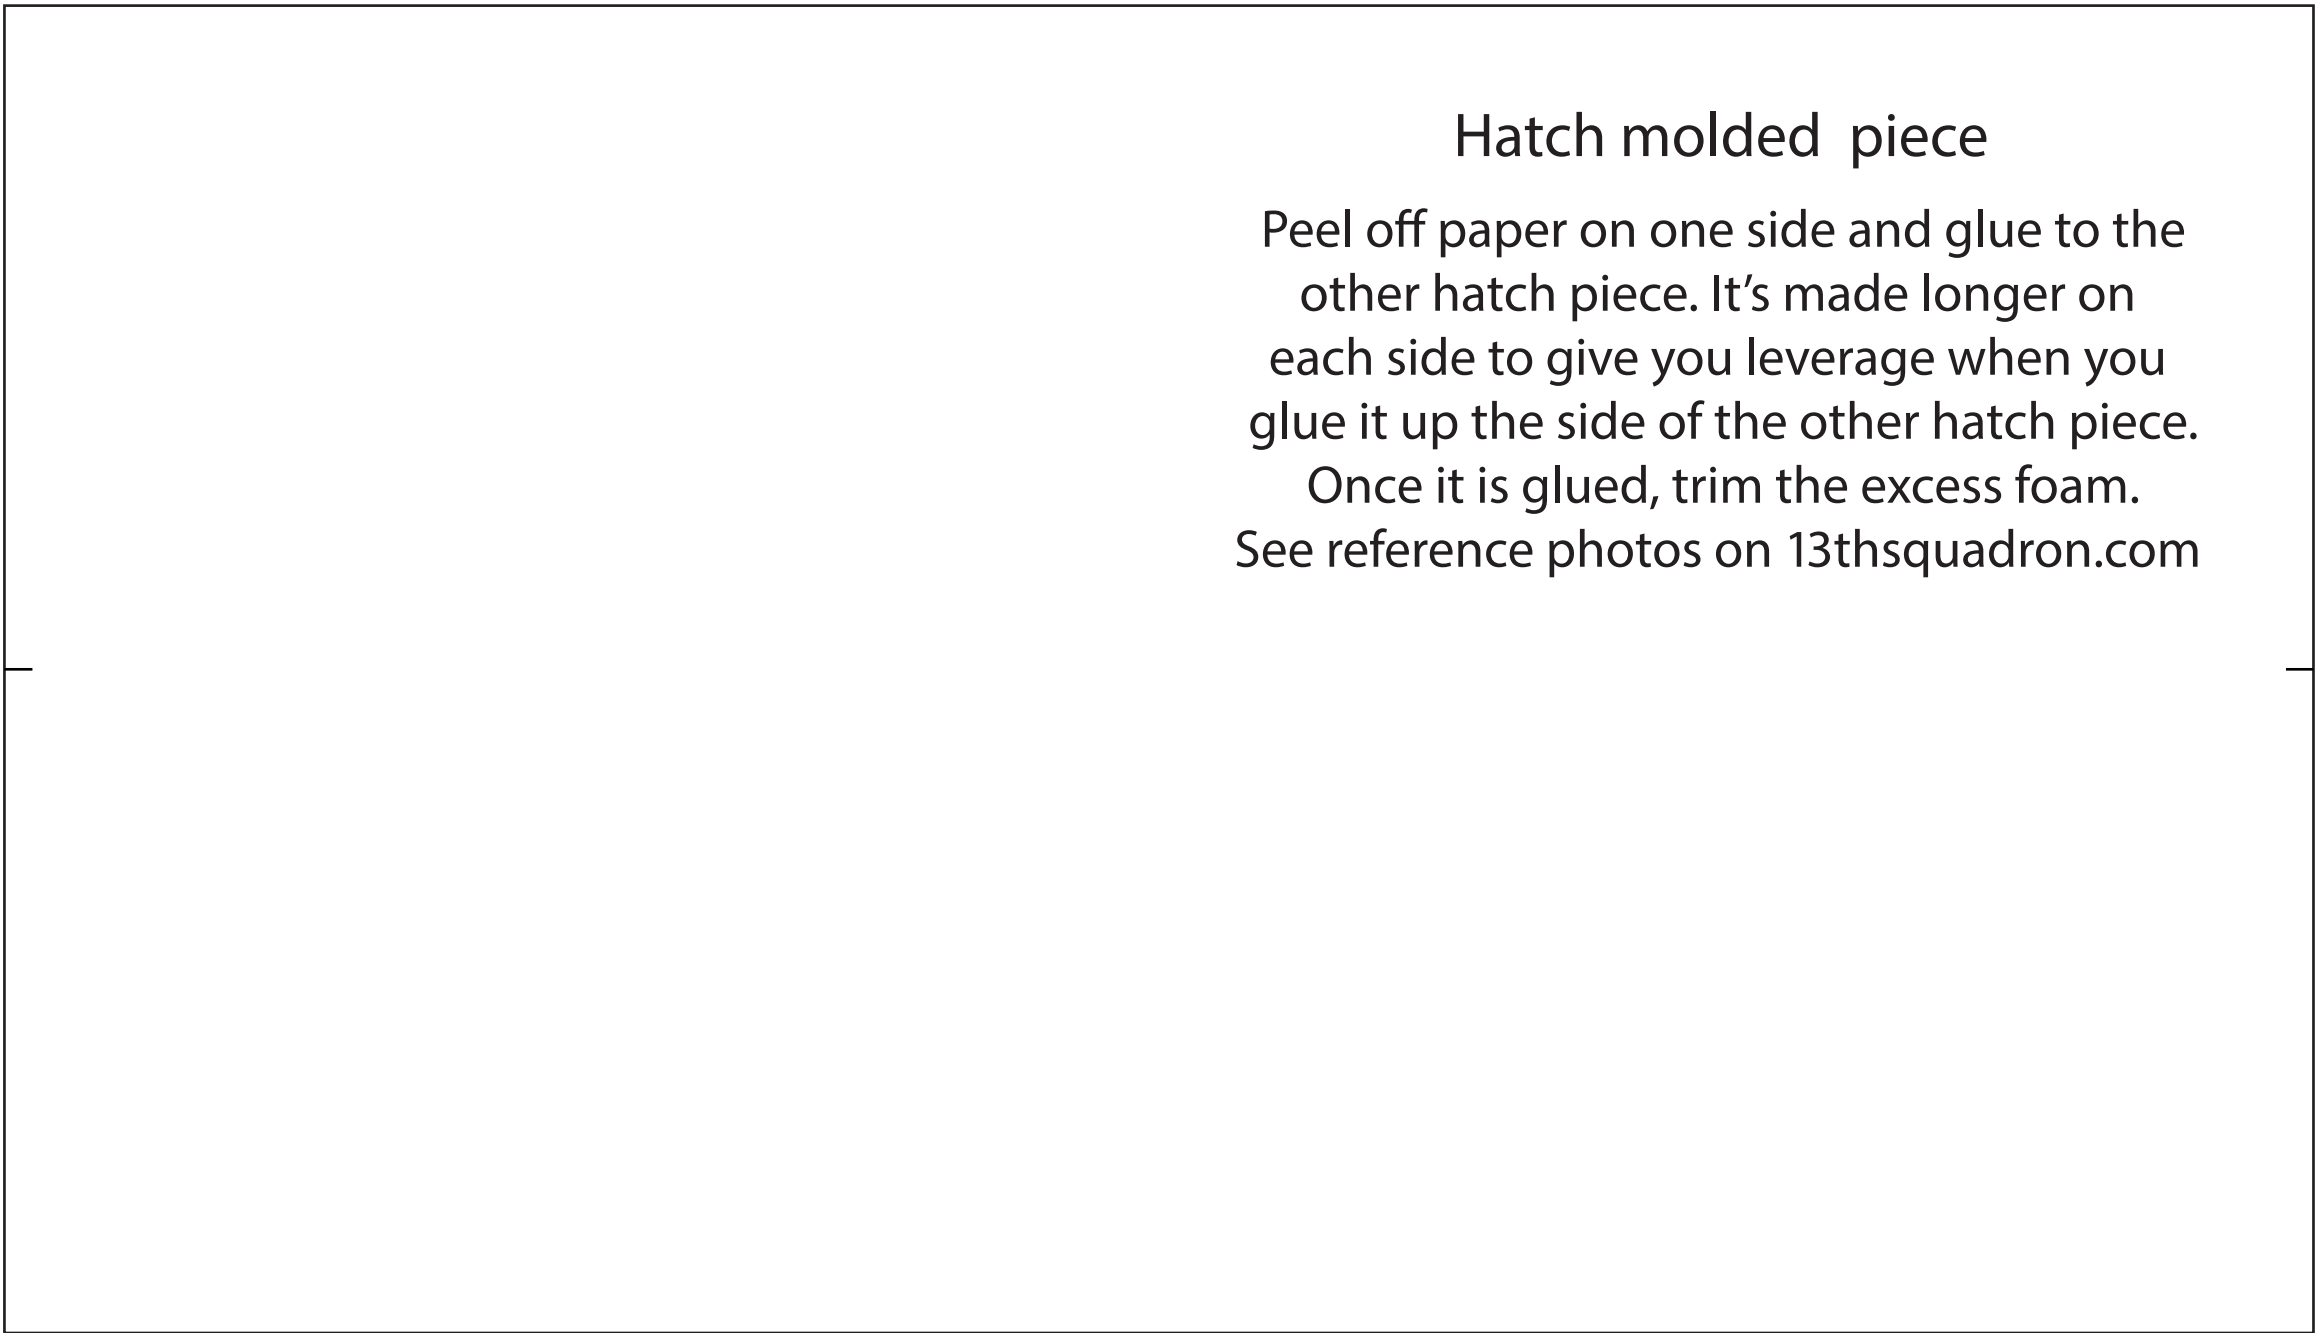

Bottom Right Wing

Landing gear  
hole.

"C" fold here. Cut out the foam, leave the paper, fold over and glue.

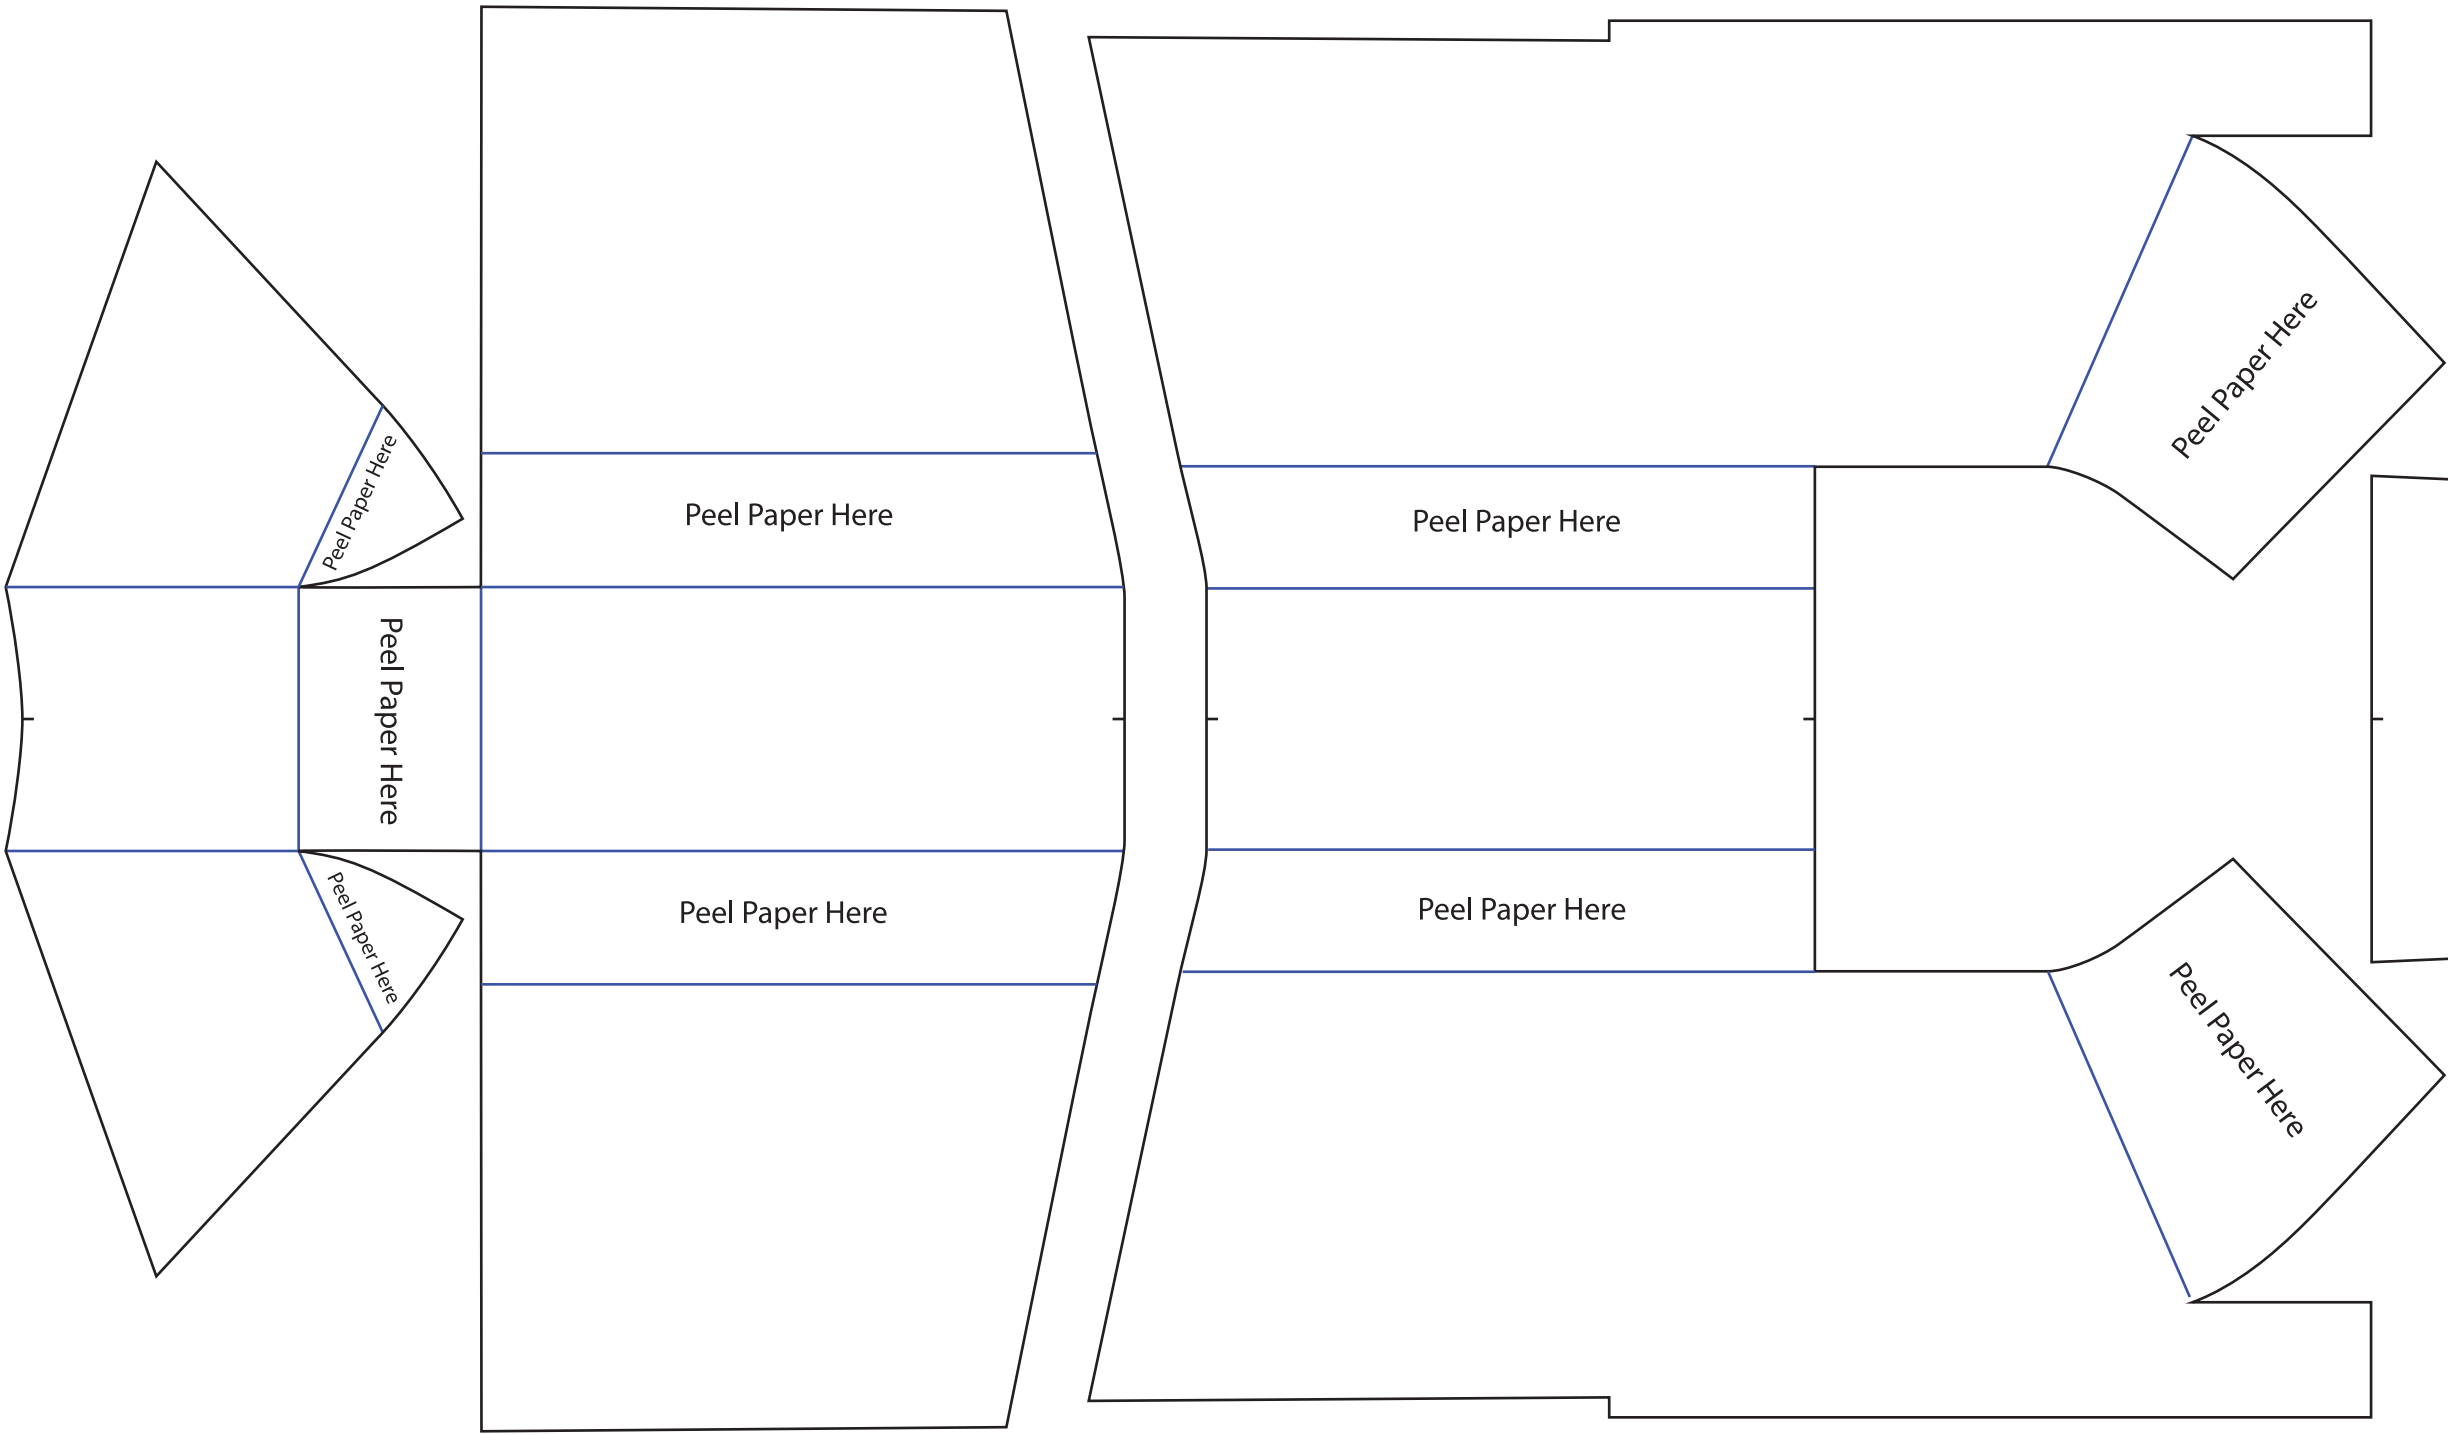

Goes here

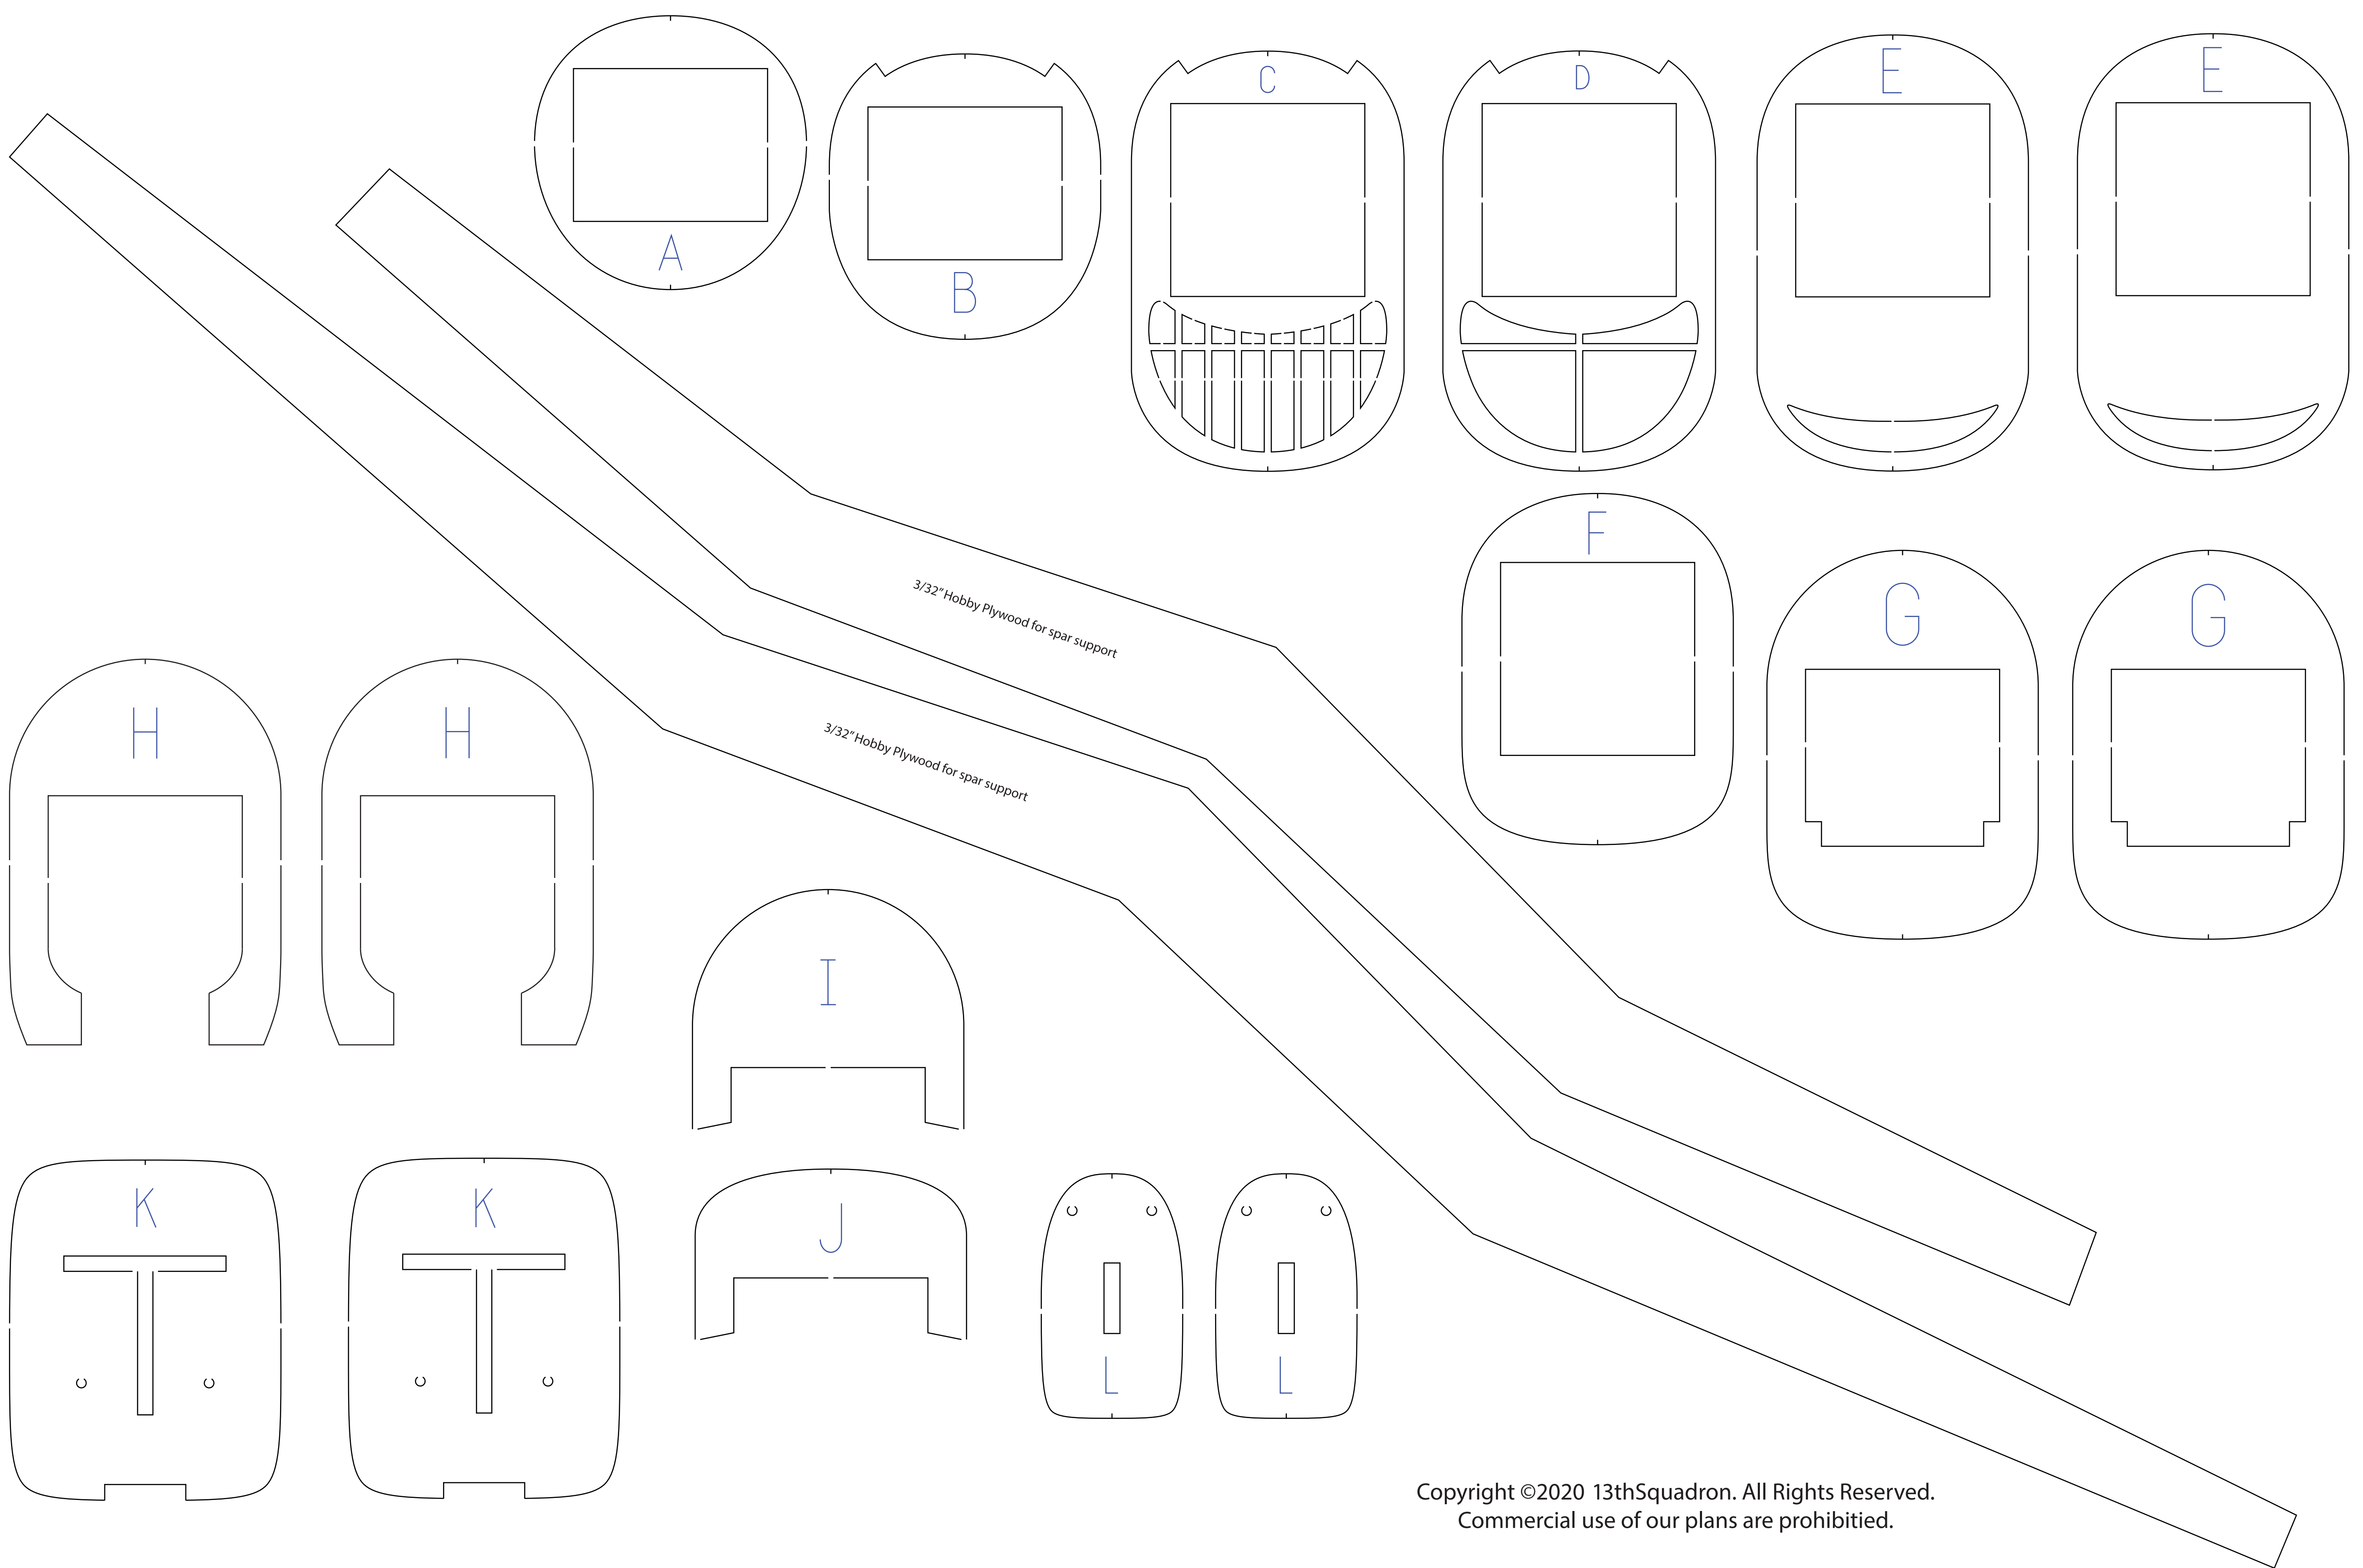

This piece slides into the Main Fuselage Box. Do not glue it in yet!  
Build everything from the "K" formers back. Once that is complete,  
slide this whole section into the Main Fuselage Box and then glue  
everything together.

Rudder piece slides into here  
after "Doubler" pieces are glued  
to each side.

## ATTENTION

Please keep in mind that these are Beta Plans. We haven't made a second plane yet to find out if all of these parts are correct but these are the pieces we used to make our Stuka. We assume that if you are challenging yourself to make this plane, you probably have the knowledge to fix any imperfections we haven't figured out yet. Good luck with the build and we hope you enjoy the plane!
